An actuarial valuation of the Kentucky Legislators Retirement Plan - Hybrid Tier (“KLRP-HT”) has been performed as of July 1, 2015. Actuarial valuations are based on the integrity of employee data, plan asset data, plan provisions and an extensive set of assumptions regarding future events. There is necessary uncertainty with any actuarial calculation based on the accuracy of the data provided, the correct interpretation of plan provisions and the realization of the assumptions made. These results were based on participant data and asset information provided by The Kentucky Judicial Form Retirement System. This information was not audited but was reviewed for reasonableness.

Detailed explanations of the actuarial assumptions and methods used in the report are contained in later sections of this report. Also included in this report is a summary of provisions of the plan as we understand them.

This report provides details on the actuarial valuation underlying the recommended contribution to the KLRP-HT for plan years commencing in 2016 and 2017. This determination was performed pursuant to Kentucky Revised Statute (“KRS”) §21.525 for the retirement system defined in KRS §6.500 to §6.577. KRS §21.525, as well as other statutes found in KRS Chapter 21 cited hereafter, are made applicable to KLRP-HT by KRS §6.525.

Governmental Accounting Standards Board Statement 67 (“GASB 67”) and Statement 43 (“GASB 43”) establish financial reporting standards for defined benefit pension plans and other postemployment benefit (OPEB) plans sponsored by employers that are subject to governmental accounting standards. Governmental Accounting Standards Board Statement 68 (“GASB 68”) and Statement 45 (“GASB 45”) provide standards for reporting pension and OPEB expenditures and expense, and related liabilities and assets for such plans. The purpose of this report is to provide pertinent financial statement disclosure information for the fiscal year ending in 2015. Actuarial computations under Statements 67, 68, 43, and 45 are for purposes of fulfilling plan and employer governmental accounting requirements. This report has been prepared on a basis consistent with our understanding of the statements and does not constitute legal, accounting, tax or investment advice.

Statement 68 sets forth a methodology for the calculation of the annual Pension Expense for the upcoming fiscal year. GASB 68 provides a method for reflecting prior gains and losses from asset and plan experience, as well as other areas including plan amendments. Amounts not reflected previously or in the upcoming year are reflected in the Deferred Outflows and Inflows of Resources shown.

Statement 45 sets forth a methodology to determine annual adjustments to the Annual Required Contribution (ARC), which is the contribution recommended pursuant to the appropriate actuarial valuation, to account for differences between amounts expensed and contributions actually made. Under GASB 45, the resulting adjusted amount is referred to as the Annual OPEB Cost (AOC) and the accumulated difference between the AOC and the actual contribution is referred to as the Net OPEB Obligation (NOO).

BPS&M is not providing information concerning liabilities other than benefits, such as for legal or accounting fees.

BPS&M is not aware of any significant events subsequent to the current year’s measurement date that could materially affect the information contained in this report.

We are not aware of any relationship between the plan or plan sponsor and BPS&M, LLC or our parent corporation, Wells Fargo Company, which would impair or appear to impair our objectivity.

To the best of our knowledge, all information provided in this report is complete and accurate and disclosures for GASB purposes have been determined in accordance with generally accepted accounting principles.

SUMMARY OF REPORT

An actuarial valuation of the Kentucky Legislators Retirement Plan - Hybrid Tier (“KLRP-HT”) was conducted as of July 1, 2015. The purpose of the valuation is to determine the cost implications of the plan including a determination of annual funding levels for the fiscal years beginning July 1, 2016 and July 1, 2017.

In 2013 the applicable state statutes were amended to close participation in the traditional defined benefit tier, with all individuals first electing to participate in Kentucky Legislators Retirement Plan (“KLRP”) on or after January 1, 2014 being covered under a new hybrid cash balance tier. **This report covers only the hybrid cash balance/OPEB tier of KLRP.**

It is our understanding that this plan is a “governmental plan” as defined in Internal Revenue Code Section 414(d) and this report has been prepared on that basis.

On the basis of the valuation, it has been determined that the annual funding requirements for the State for the fiscal year beginning in 2016 for the plan, as described in the Summary of Benefits section of this report, are as follows:

	Total Amount	Percent of Payroll
Annual Required Contribution	\$ 20,918	4.99%
Recommended Contribution	\$ 20,918	4.99%

The Annual Required Contribution is determined based on assumptions and methods set forth in the statute and established by the Board of Trustees. The Recommended Contribution is determined as the greater of the Annual Required Contribution and 4.00% of payroll.

Summary of Selected Plan Information

	<u>Plan Year Beginning</u>	
	<u>7/1/2015</u>	
Number of Participants		
Active		11
Terminated Vested		0
Retired		0

Unfunded Accrued Liability (UAL)		4,965
Funded Ratio (AVA/AL)		83.31%
Annual Funding Level ¹		
State Portion of Normal Cost	\$	20,521
Expected Employee Contributions		25,141
Total Normal Cost		45,662
Annual Required Contribution		20,918
Percent of Covered Payroll		4.99%

¹In accordance with KRS 21.525 (legally prescribed funding method).

Legislative Background

As stated previously, state statutes were amended in 2013 such that all participants entering KLRP on or after January 1, 2014 will be covered under a hybrid cash balance/OPEB tier; those entering before that date will continue to be covered under the traditional defined benefit/OPEB tier. The legislation making this change also restricted the availability of future cost-of-living adjustments (COLA's) to plan benefits.

Statement No. 25 of the Governmental Accounting Standards Board was amended by Statement No. 67 of the Governmental Accounting Standards Board. GASB 67 became effective for the plan's financial statements for the plan's fiscal year beginning after June 15, 2013. GASB 67 establishes financial reporting standards for state and local government pension plans that are administered through trusts or equivalent arrangements. The objective of this statement is to improve the usefulness of the information included in pension plan reports. GASB 67 requires, among other things, the replacement of the Net Pension Obligation with the Unfunded Net Liability, which is the Entry Age Normal accrued liability minus the market value of assets.

Statement No. 27 of the Governmental Accounting Standards Board was amended by Statement No. 68 of the Governmental Accounting Standards Board. GASB 68 became effective for the plan's financial statements for the plan's fiscal year beginning after June 30, 2014. The statement provides standards for reporting pension expenditures and expense, and related pension liabilities and assets, for such plans. GASB 68 requires the determination of the pension expense for the fiscal year beginning July 1, 2014. GASB 68 provides a new approach in calculating the pension expense which differs significantly from GASB 27 methodology.

Actuarial Soundness

A plan that has adopted a reasonable funding method, that adopts reasonable assumptions and which contributes at a rate at or above the recommended contribution rate (based on these reasonable methods and assumptions), could be considered to be actuarially sound.

In order to ensure KLRP-HT is funded in an "actuarially sound manner", we would recommend the following:

1. Revise the actuarial funding method to amortize all past unfunded as well as new liabilities over a period not more than 15 years and amortize future gains and losses over a period not more than 15 years. (Note that GASB 68 may require the expensing of liabilities at a faster pace than these amortization periods.)
2. Contribute at least the recommended contribution each year.

Deviations from these recommendations may result in an "actuarially unsound" approach to funding KLRP-HT and may eventually result in KLRP-HT becoming insolvent – that is, exhausting assets at which time all future benefits would be provided on a pay as you go basis.

Although the Actuarial Standards of Practice 4 "Measuring Pension Obligations" allows for plan liabilities to be calculated under a legally prescribed method, the statement goes on to say,

"If, in the actuary's professional judgment, such an actuarial cost method or amortization method is significantly inconsistent with the plan accumulating adequate assets to make benefit payments when due, assuming that all actuarial assumptions will be realized and that the plan sponsor or other contributing entity will make contributions when due, the actuary should disclose this."

It is our professional actuarial opinion that the current legally prescribed method, which requires contributions of normal cost plus interest on the unfunded liability plus 1% of the unfunded liability (per KRS 21.525), is inconsistent with the plan accumulating adequate assets to make benefit payments when due, assuming all actuarial assumptions are realized.

The information contained in this document (including any attachments) is not intended by BPS&M to be used, and it cannot be used, for the purpose of avoiding penalties under the Internal Revenue Code that may be imposed on the taxpayer. The information and valuation results shown in this report are, to the best of our knowledge, complete and accurate and are based upon the following:

1. Employee census data as of July 1, 2015, submitted by The Kentucky Judicial Form Retirement System. This data was not audited by us but appears to be sufficient and reliable for purposes of the report.
2. Financial data as of June 30, 2015, submitted by The Kentucky Judicial Form Retirement System. This data was not audited by us but appears to be sufficient and reliable for purposes of the report.
3. Actuarial assumptions and methods as established either by statute or the Board. The actuarial assumptions currently adopted by the Board appear to be reasonable, both individually and in aggregate.
4. For purposes of GASB 43, 45, 67, and 68 disclosures, assets were split between pension and retiree medical liabilities on the basis of the employee and employer contributions allocated to each part and a prorata allocation of investment return. This methodology was based on the process used to split assets in the traditional defined benefit plan between the pension and retiree medical components.

We believe the information is sufficiently complete and reliable. This report provides actuarial advice and does not constitute legal, accounting, tax or investment advice.

The actuarial valuation summarized in this report has been performed utilizing generally accepted actuarial principles. It is my opinion that the results fully and fairly disclose the actuarial position of the plan on the valuation date. I am a consulting actuary for BPS&M, LLC, member of the American Academy of Actuaries and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein.

Source

Sections 6.500-6.577 of the Kentucky Revised Statutes and 2013 Senate Bill 2

Eligibility for Membership

Members of the General Assembly may elect to make monthly contributions within 30 days after taking office, and thereby become eligible for membership in the plan. Individuals commencing participation before January 1, 2014 became participants in the KLRP.

Hypothetical Member Account

The Hypothetical Member Account for each member is credited monthly with 9% of “creditable compensation” (including a 5% employee credit and a 4% state credit), as well as interest as described below. The Hypothetical Member Account balance on June 30 each year is equal to the sum of all prior contribution credits and all prior interest credits.

Employee Contributions

All members contribute 5% of their “creditable compensation” to help fund their pension benefit. Additionally, all members contribute 1% of their “creditable compensation” towards the retiree medical benefit.

State Contributions

The state contributes actuarially determined amounts to finance benefits.

Creditable Compensation

Creditable compensation is based on actual compensation received during each year.

Interest on Hypothetical Member Account

The Hypothetical Member Account will be credited with 4% annually. The credit will be applied on each June 30 based upon the Hypothetical Member Account balance from the preceding June 30. No interest credit is provided for contribution credits made in the current year.

Additionally, if the geometric average net investment return for the prior five years (or years since the effective date of the hybrid plan, if less) exceed 4%, members who were active and participating in the prior year will have their hypothetical accounts credited with 75% of the amount of the return over 4%. This additional interest credit is applied in the same method as the interest credit in the prior paragraph.

Normal Retirement

Condition

Members who have attained age 65 and completed at least 5 years of legislative service. However, for members who are at least age 57, members may retire if age plus service equals 87 years.

Benefit

A member will receive their accumulated Hypothetical Account as either a lump sum or as one of a variety of annuity options, calculated by dividing their accumulated Hypothetical Account by an actuarial factor.

Early Retirement

A member who retires prior to normal retirement date with at least 5 years of service is eligible for a full refund of their accumulated Hypothetical Account as a lump sum.

Termination Benefit

If a legislator ceases to be a member of the plan prior to having 5 years of service, the amount of the member’s accumulated contributions shall be returned to the member, including the member contributions and the interest applicable to this portion of the account. A member terminating with less than 5 years of service does not receive a refund of state contributions nor the interest applicable to this portion of the account.

Death Benefit

Upon the death of a member who at the time of death was receiving a retirement income, the named beneficiary shall receive survivor benefits based upon the form of retirement benefits being received.

If a member with at least 5 years of service dies before retirement, the named beneficiary is entitled to receive a full refund of the accumulated Hypothetical Member Account. If a member with less than 5 years of service dies before retirement, the named beneficiary is entitled to receive a refund of the member’s accumulated contributions, including the member contributions and the interest applicable to this portion of the account.

Medical Insurance Premium Supplement

Retired members with at least 15 years of service, in addition to actual retirement benefits, will receive a monthly medical insurance benefit of ten dollars per year of service.

The current premium rates in effect are:

	<u>Monthly Premium</u>
<i>Under age 65</i>	
Family coverage	\$1,701.04
Single coverage	699.28
Parent Plus coverage	995.34
Member and Spouse	1,528.34
<i>Age 65 or older</i>	
Medicare Advantage PPO	391.00

Premium rates are approved by the Board.

Funding Method

Accrued liability and normal cost calculated based on Entry Age Normal funding method. The required contribution is calculated based on KRS 21.525, which requires contributions of normal cost plus interest on the unfunded liability plus 1% of the unfunded liability.

Interest

4% per annum – this rate was selected by the Board of Trustees and BPS&M and the Fund Investment Manager believe this to be a reasonable long-term rate of return assumption.

Mortality

RP-2000 Mortality Tables with white collar adjustment with Pre and Post Commencement Rates with projected mortality improvements after year 2000 under Projection Scale AA (male and female scales); i.e., full generational mortality.

Terminations

Table T-4 from the Actuary's Pension Handbook. Specimen rates are as follows:

<u>Age</u>	<u>Rate of Termination</u>
20	.054
25	.053
30	.051
35	.047
40	.042
45	.035
50	.025
55	.009
60	.001
65+	.000

Salary Increases

1% for the next five years, and 3.5% thereafter.

Disability

None

Retirement Age

Retirements were assumed to occur as follow:

<u>Retirement Age</u>	<u>Percentage of Active Members Retiring</u>
NRA-5	16.67%
NRA-4	20.00%
NRA-3	25.00%
NRA-2	33.33%
NRA-1	50.00%
NRA	100.00%

NRA = Normal Retirement Age

In addition to these rates, an extra 20% rate is assumed at the age a member reaches 27 years of service credit.

Post-Retirement Death Benefit

Assumption is that 80% of the legislators would be married at retirement and the husband would be 3 years older than the wife on average.

Pre-Retirement Death Benefit

Assumption is that 80% of the legislators would be survived by a spouse upon death prior to retirement and that the husband would be 3 years older than the wife on average.

Form of Benefit

All participants are assumed to receive a lump sum.

Medical Insurance Premium Supplement

Medical premiums and claim costs will increase for each year beyond the valuation date at the following rates:

Year 1	11%
Year 2	10%
Year 3	9%
Year 4	8%
Year 5	7%
Year 6	6%
Years 7+	5%

ACTUARIAL ASSUMPTIONS

An annual COLA of 1.5% is applied to the monthly insurance benefit, beginning at retirement.

100% of eligible retirees are assumed to elect the benefit. It was further assumed that coverage would be split among retirees as follows:

	% of Retirees	% With Spouse Coverage
<i>Pre-Medicare Coverage</i>		
Family	32%	N/A
Single	21%	N/A
Parent Plus	32%	N/A
Member and Spouse	16%	N/A
<i>Medicare Coverage</i>		
Medicare Advantage PPO	100%	75%

The assumed annual claims costs per subscriber as of July 1, 2015 are:

<u>Pre-65 Cost</u>	<u>Post-65 Cost</u>
\$ 17,101	\$ 8,211

Claims were adjusted downward 3% each year for aging for attained ages 55 to 65.

Retirees are assumed to contribute the difference between the premium rate and the portion of the premium paid by the Plan. Premium rates and Plan contributions are described in the Summary of Benefits.

Non-members

Legislators electing not to participate are assumed to continue as non-members in the future.

Asset Valuation Method

The determination of the actuarial value of assets is as follows:

1. Investment gains/losses are determined for each year by comparing the expected value of assets based on the assumed interest assumption to actual market value. Expected value of assets in each year shall be determined by projecting the market value of assets from the prior year using the assumed interest rate, plus contributions less benefit payments and plan expenses (adjusted with interest at the assumed rate). If the expected value of plan assets is different than the actual market value of plan assets then the difference is treated as a gain or loss for that year.
2. The amount of any gain or loss as determined above shall be recognized evenly over the subsequent five years.
3. The actuarial value of assets on any valuation date shall be equal to the market value of assets on that date adjusted as follows:
 - Reduced by 80% of a gain or increased by 80% of a loss from the preceding year
 - Reduced by 60% of a gain or increased by 60% of a loss from the 2nd preceding year
 - Reduced by 40% of a gain or increased by 40% of a loss from the 3rd preceding year
 - Reduced by 20% of a gain or increased by 20% of a loss from the 4th preceding year

This asset valuation method is used in both the determination of funding levels as well as for disclosure purposes under GASB Statement Nos. 43 and 45. The fair market value of assets is used for disclosure purposes under GASB Statement Nos. 67 and 68.

For purposes of GASB Statement Nos. 43, 45, 67, and 68, the market value of assets has been allocated between retirement related and medical premium supplement liabilities. This market value allocation is carried forward each year based on the following:

1. State and member contributions, are allocated pro-rata reflecting the ARC for that year.
2. Benefits paid reflect actual benefits paid relative to retirement related benefits separately from medical premium supplements.
3. Preliminary assets are determined by adjusting beginning value for allocated State and member contributions and actual benefits paid.
4. Net investment return is allocated pro-rata based on the preliminary assets developed in the previous step.
5. Allocated assets as of the valuation date equal the preliminary balance plus the allocated share of investment income.

Actuarial value of assets is developed initially in total and then allocated between retirement related benefits and medical premium supplement benefits on a pro-rata basis reflecting allocated share of market value as of the valuation date.

Additional Requirements Under GASB Statement No. 67

GASB Statement No. 67 also requires a Statement of Fiduciary Net Position (which includes a breakdown of current assets by type) and additional investment information, including the annual money-weighted rate of return. In order to satisfy GASB Statement No. 67, these required pieces will need to be provided by The Kentucky Judicial Form Retirement System. BPS&M is prepared to assist the system as needed.

Pension Expense & Deferred Outflows/Inflows of Resources

For the year ended June 30, 2016, the recognized pension expense will be \$10,400. At June 30, 2016, The Kentucky Judicial Form Retirement System reported deferred outflows of resources and deferred inflows of resources in relation to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources	Remaining Amort. Period
Net difference between projected and actual earnings on investments	263	-	4.000 years
Total	\$ 263	\$ -	

Actual investment earnings above (or below) projected earnings are amortized over 5 years. Changes of assumptions are amortized over the average remaining service period of actives and inactive (0 years of future service is assumed for inactive for this calculation).

Amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year ended June 30:	
2017	66
2018	66
2019	66
2020	66
2021	-
Thereafter	-

In addition, Governmental Accounting Standards Board Statement 71 (“GASB 71”) requires contributions between the measurement date (July 1, 2015) and the disclosure date (June 30, 2016) for GASB 68 be reported as a deferred outflow of resources.

Schedule of Funding Progress Under GASB Statement No. 43

Actuarial Valuation Date	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) (b)	Unfunded AAL (UAAL) (b - a)	Funded Ratio (a / b)	Covered Payroll (c)	UAAL as a % of Covered Payroll ((b - a) / c)
7/1/2015	\$ 4,666	\$ 8,027	\$ 3,361	58.1%	\$ 419,012	0.8%

Schedule of Employer Contributions Under GASB Statement No. 45

Year Ended June 30	Annual Pension Cost	Percentage Contributed	OPEB Benefit Obligation
2015	\$ -	100%	\$ 0

Determination of Annual OPEB Cost Under GASB Statement No. 45

Fiscal Yr Ending	Applicable Valuation Report Used	ARC	Interest on OPEB Obligation	ARC Adjustment	Amort. Factor	OPEB Cost	Contribution	Change in OPEB Obligation	OPEB Obligation Balance
6/30/2015		\$ -	\$ -	\$ -	17.292033	\$ -	\$ -	\$ -	\$ -

Notes to GASB 43, 45, 67 and 68 Disclosures

1. The tables in this report account for liabilities and assets only for the hybrid cash balance/OPEB tier under the plan; liabilities and assets pertaining to the traditional defined benefit /OPEB tier are presented in a separate report.
2. Actuarial accrued liability is based on the entry age normal funding method.
3. OPEB liabilities and allocated assets have been excluded from GASB 67 and 68 disclosures and established in GASB 43 and 45 disclosures.
4. Market value of assets were split between pension and OPEB obligations based on the basis of the employee and employer contributions allocated to each part and a prorata allocation of investment return. Actuarial value of assets is then allocated based on the market value of retirement and OPEB assets.
5. Actuarial value of assets uses a 5-year asset smoothing method.
6. Covered payroll reflects payroll for all current plan members.
7. Interest on OPEB Obligation is based on assumed valuation interest assumption for the prior year, 4% beginning with 2015 valuation.
8. GASB 67 replaces GASB 25 effective for the fiscal year ending June 30, 2014. The valuation date, disclosure date, and measurement date all fall on the same date for purposes of GASB 67.
9. GASB 68 replaces GASB 27 effective for the fiscal year ending June 30, 2015. It is assumed the measurement date for GASB 68 will be 12 months before the disclosure date. For the year ending June 30, 2016, the measurement date is July 1, 2015 (the valuation date).
